SUMMARY OF EXPERIENCE AND TEAM MEMBERS

Waterdog Products, Inc. is a talented company capable of producing a wide variety of high quality fiberglass products. We started building custom windsurfing boards in 1988, but in 1996 turned our focus to custom aquarium and museum exhibits. Backed by a proven and established track record of tanks in many of the world's finest aquariums, a Waterdog exhibit tank will always bring innovation, quality and value to your project.

Waterdog offers a single source solution for aquarium design/build projects including:

- Engineering services
 - ◆ 3D modeling and all production drawings using the latest version of AutoCAD
 - ◆ Structural calculations by a licensed engineer registered in the state of California
- Custom hand-tooled mold building
- State-of-the-art FRP tank manufacturing
- All-acrylic tank supply
- Acrylic or glass viewing windows supply and in-house installation
- Tank stand design and supply
- Experienced oversight of LSS and water systems services

Key members of the Waterdog Team:

- **John Harriman**, President and point of contact
- **Kerry Krieger**, CAD Manager and key contributor
- **Dee Meskimen**, Facility Management and key contributor

Overall, the key members of our team bring more than 55 years of combined experience in all aspects of aquarium tanks design, manufacturing, installation and repair.

On call team consultants:

- **Kurt Jordon**, licensed Professional Engineer with over 15 years specializing in fiber reinforced composite products. Kurt also has an intimate working knowledge of aquarium design through his extensive experience working with Waterdog Products.
- **Other consultants as needed**, Waterdog enjoys the benefits of having been well-established in the aquarium industry for 20 years and because of the relationships garnered over the years, can add to the team as needed to satisfy the clients' requirements.
